Cut List	
1.	
2.	
3.	

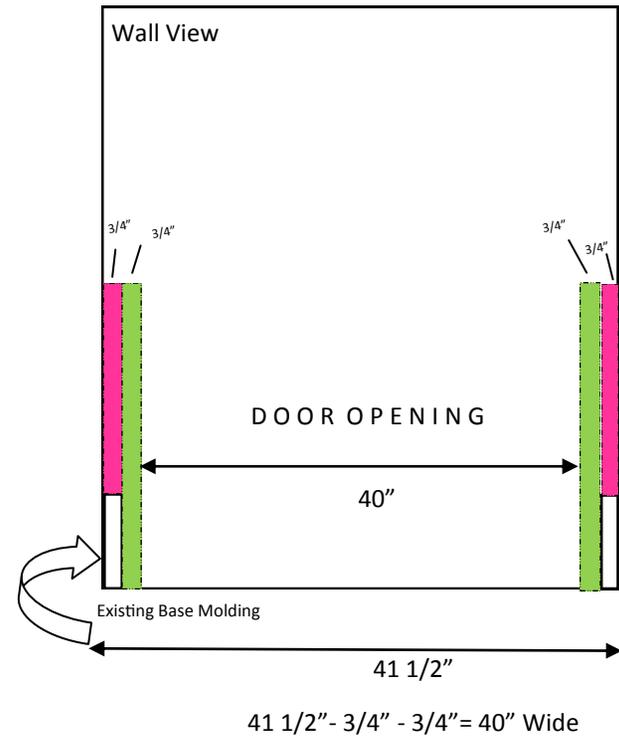

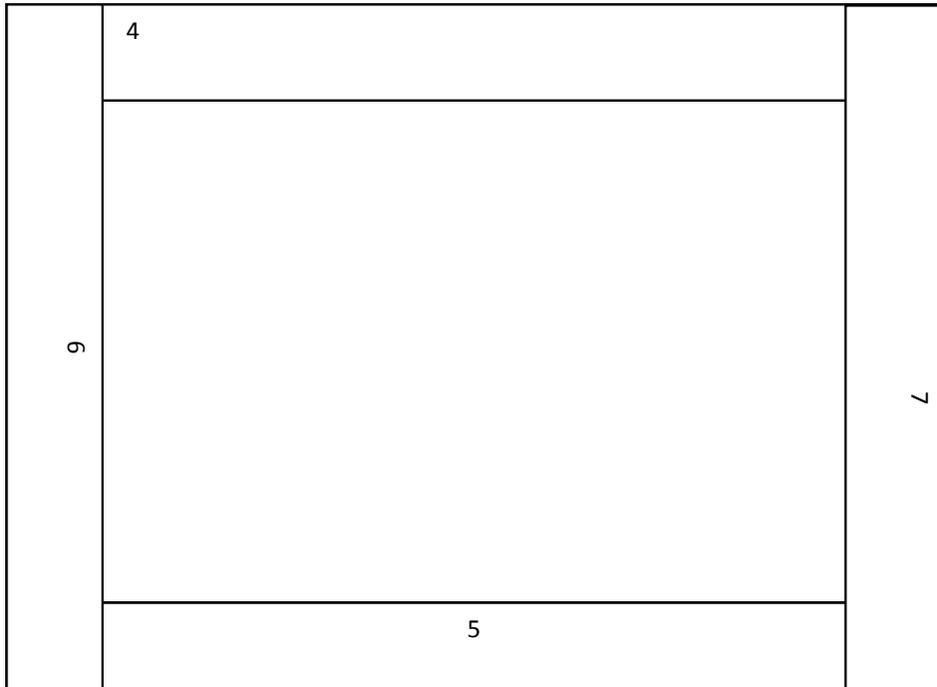

Instructions	
1.	Attach base piece 1 to wall. Be sure it is connected to studs in the wall or there is some kind of anchor. The weight will be held with this piece.
2.	Attach door jam hinge piece 2 to base piece 1 using trim screws. My screws were long enough to go through the base piece so I also tried to hit the studs with this piece as well.
3.	Attach door jam stopper 3 to door jam hinge piece 2.

My Georgia House DIY Baby Gate

My base molding is 3/4". First piece makes base and wall even, the second door jam hinge piece will make opening measurement for door -3/4" off the total. For example my measurement for piece 4 and 5 for the door will be 3/4" + 3/4" = 1 1/2" off the total.

- 4.
- 5.
- 6.
- 7.

My Georgia House DIY Baby Gate

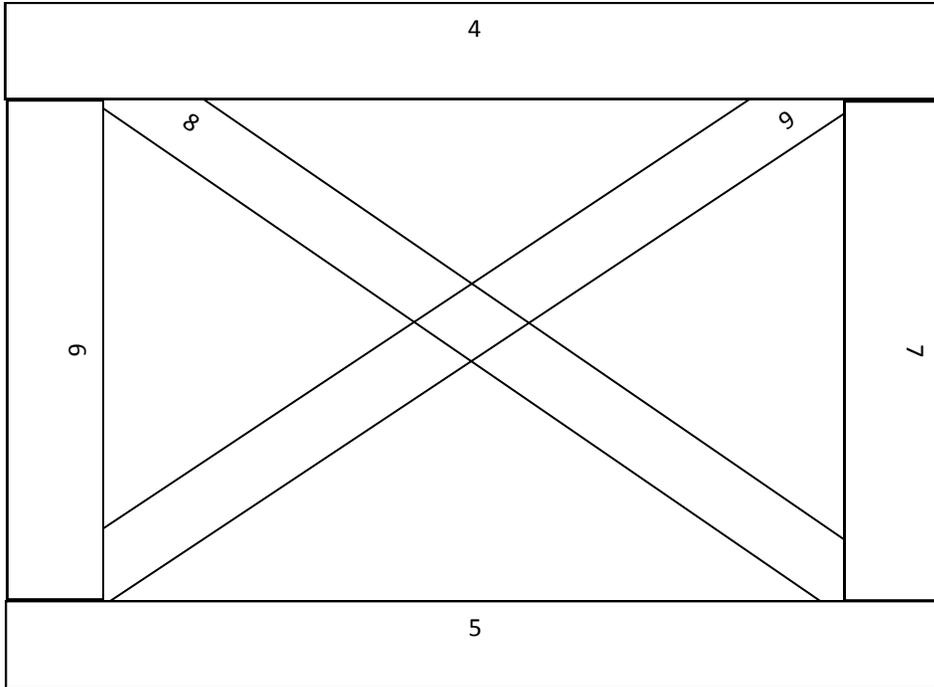

Instructions

Bead board sizing : Measure entire back to cover. Could repeat initial steps to build two door frames and sandwich bead board for two finished sides. OR use bead board as finished back side. I plan to use 3/4" screws to attach.
